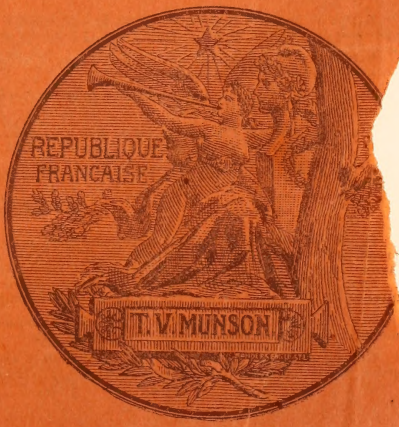
DENISON, TEXAS.

CATALOGUE.



Murray's Power Print, Denison, Texas.

TERMS, PLEASE OBSERVE.

Cash, (by Draft, Money Order, Registered Letter) WITH ORDER will secure prompt filling. No goods shipped unless CASH OR SATISFACTORY SECURITY accompanies the the order.

To secure goods, not wanted sent at once, send one-half the cost with order. No reserve will be made otherwise, save to well known and reliable parties, and by special agreement. **Goods will be shipped "C. O. D."** only when one-half payment is sent with order, or to well known and thoroughly reliable parties.

At prices named, goods are carefully packed in moss and straw, well bailed or boxed, and delivered to forwarders here, after which my responsibility ceases, except for mistakes in filling, which must be reported within five days after receipt of goods, to admit of adjustment. A double system of checking is employed in putting up orders, so that mistakes are rare, and sometimes customers complain of an error and afterwards find it was their own mistake. Be careful in unpacking, to note everything and IMMEDIATELY "HEAL IN" IN MOIST SOIL TILL PLANTED, or **plant at once.**

NEVER ALLOW THE ROOTS TO DRY, OR FAILURE WILL MOST LIKELY RESULT.

Every care is taken to secure safe and prompt transportation.

It is always better to ship by Express, unless the amount of stock is large. If money is sent to prepay express or freight, I can save customers money by prepaying, as I get special rates. No prepayment made unless money is sent. This is an accommodation I cheerfully do my customers, but I cannot prepay out of my own pocket trusting everyone to return my money. Good customers never ask it. In case a surplus of money is sent, it is promptly returned with statement.

GIVE EXPLICIT DIRECTIONS FOR SHIPMENT.

When such are not given I shall use my best judgment in selecting a route, but will not be responsible for loss thereby.

Customers will generally be most successful in getting desirable assortments, by leaving the selection in part, at least, to me, as I have much experience in testing, and growing for market, but I desire everyone to have his, or her choice as near as possible.

It is to my own interest to give customers the best terms and selections possible.

But I cannot prevent Drouths, Severe Winters, Early and Late Frosts, Insects and Rabbits, etc., from eating nor Plants from dying by Bad Treatment in Other Hands, HENCE I NEVER INSURE TREES TO LIVE AFTER LEAVING MY POSSESSION, but do deliver good stock, in good order true to name. In case I fail in these, I replace or refund money.

I AM RESPONSIBLE TO ALL MY CUSTOMERS, and to them only, for the character of the goods, and to the same or their forwarders, the express and Railway Companies, I guarantee to deliver stock in good order and true to name. With such delivery to forwarders my responsibility ceases.

☞It is a distinct agreement between me and my customers that in any case where stock fails to come up to specifications, I am liable only to replace stock or refund money received for goods in question. But no pains are spared to do a reliable business.

PRICES.

When orders amount to less than $5.00, the single rate given in catalogue will be charged. These "*single rates*" do not apply to small fruits such as Strawberries, Blackberries and Raspberries, except *single dozens*, or hundred, when dozens are not priced. No discount on small fruits at the thousand rates, unless as many as 5,000 are wanted, then 20 per cent. off.

DISCOUNTS ALLOWED.

BILLS AT SINGLE RATES, OF OVER $5 and UNDER $10, are entitled to additional selections at single rates to the amount of one-fifth of first selection, or 15 per cent. off amount of bill.

BILLS AT SINGLE RATES OF $10 to $20, are entitled to one-fourth more additional stock at single rates, or 20 cent. off entire amount of bill.

BILLS AT SINGLE RATES, OF $20 to $40, are entitled to one-third more additional stock at single rates, or 25 ent. off entire amount of bill.

BILLS AT SINGLE RATES, OF $40 to $60, are entitled to 40 per cent. additional stock at single rates, or 33⅓ per ff. All customers taking goods at Nursery will be allowed 40 per cent. off, if bill is $5 or more.

BILLS AT SINGLE RATES, OF $60 or more, will be served at regular wholesale rates, which will be given on tation.

CAUTION.

From various places, almost every season, I receive information that certain "Tree Agents" are circulat- reports that I have "gone out of business," or "been sold out by the sheriff," or that *they are my agents*, or that ave no nursery and buy all my supplies from the house they represent—"The largest Nursery on Earth," &c., This is the chief stock-in-trade of nearly all the cut-throat gang of "Tree Peddlers," who rob both the nter and honest nurseryman, by palming off seedling rubbish under high sounding names.

Friends, if you hear adverse reports of my business from these traveling swindlers, please report the parties me directly and they shall receive their just deserts.

Beware of the "Whole-Root" Fad. It is purely an advertising dodge. Trees on their *own roots*, wherever possible, are far superior to those grafted on *long pieces* of roots, as are the so-called "Whole-Root" trees.

Branford's Best, (Ky. Streak) strong, abundant, striped, large, very good, market.

Rutledge. This variety was obtained from Mr. Frank Rutlege of Travis county, Texas, on whose plantation the original tree now stands. Concerning its history and description, Mr. Rutledge wrote me February 22, 1891, "The tree is growing on my place, and was planted out where it now stands, in 1856. There was a man by the name of Scott who brought some apple seed from Arkansas in 1854 and planted them. He gave my father, W. P. Rutledge, two of the seedling trees, one of which died twenty years ago, the other still lives. It is healthy, prolific and entirely free from disease. The body is twenty inches in diameter, and the top fifty feet in diameter. It grows on black pebbly soil, with clay sub-soil."

The specimens of fruit received from Mr. Rutledge, were large, handsome, richly striped, resembling the Bradford's Best somewhat, and of still finer quality than that splendid variety. It ripens after the Ben Davis shortly. In this I believe we have one of the most valuable of all Southeren apples. This apple should be tested extensively. $1 each, $9 per dozen. It bears abundantly.

Winesap, good, prolific, red, medium, very good, market.

PEACHES.

IN ORDER OF RIPENING—3 TO 4 FEET, 10 CTS.; 4 TO 6 FEET, 15 CTS., UNLESS OTHERWISE NOTED.

Each "Ripening" extends over a period of ten to fifteen days, and embraces white and yellow fleshed, free and cling varieties, where possible. Nearly all of the varieties have been critically tested by me, along with numerous other kinds, in three successive test orchards, planted and fruited within the past ten years in different soils and situations. Not a variety is included which has not been tested by experienced and critical Orchardists and pronounced valuable for the particular purposes and sections for which they are recommended. Desirable qualities in tree as well as fruit, have been considered. Those varieties followed by the letter *a* are recommended for amateur or family planting. In size and quality of fruit they are usually the very finest, but not prolific, or firm enough, or of the right season for profitable planting, excepting in very favorable localities.

Those followed by *c* are recommended for CANNING.
Those followed by *e* are recommended for EVAPORATING.
Those followed by *m* are recommended for MARKETING FRESH.
Those followed by *c e m* will make an excellent "All Purpose" variety.

Captain Jack is used here as a fertilizer of Crescent almost exclusively, and makes the best market companion for it. It is large, crimson, firm, good, very productive.

Bubach, No. 5, new, large, handsome, productive, valuable, successful here, pistilate.

THE PARKER EARLE STRAWBERRY.

STILL "ON TOP," AND TO STAY.

Get from Headquarters, and thus be Sure of the Genuine.

DESCRIPTION:—Plant robust, free from disease, stooling heavily, and renewing itself sufficiently by strong runners. It is a model in make up; endures the extremes of heat and cold remarkably well.

The illustration is an exact copy of a photograph of a complete and well grown plant. It will be noted that the roots are exceedingly long and abundant, capable of meeting all the demands of the immense crops it produces. Season medium to very late.

Berry, regular, uniformly large, conical, with a neck, glossy, scarlet crimson, ripens all over, flesh, firm, crimson, no hollow core; seeds, golden, becoming crimson, prominent, protecting in handling; quality, excellent. Flowers, perfect, always setting perfect fruit, which is borne in the greatest profusion, the rate of sixteen thousand quarts to the acre having been gathered. The fruit carries well and brings the very highest pride in market. Shipped from Denison to St. Louis, over 600 miles, in perfect order in common 24 quart cases. Hundreds of cases shipped from Denison to Kansas City and other distant markets in perfect order, and bringing highest price.

A book can be filled with unqualified praise of this variety, from the best strawberry authorities in the country.

PRICE OF PLANTS:—75c. per 12; $3.00 per 100 by mail; $15.00 per 1,000 by express; 500 for $7.50.

SERVICE BERRY.

Success, dwarf bush, a black fruit one-half inch in diameter, resembling Huckle Berries, borne in cluster in great profusion: ripe early in May: rich, pleasant, fresh or in deserts or pies; very hardy and successful South or North. 10c. each, $1.00 per dozen.

MULBERRIES.

4 TO 6 FEET, 15 CTS.; 6 TO 8 FEET, 20 CTS.; LARGE, 25 TO 50 CTS.; UNLESS OTHERWISE NOTED.

Hick's Everbearing, profuse three months, fine grower for shade, and the best of all trees for the fowl-yard.

Victoria, said to be the finest of everbearing mulberries: introduced by G. Onderdonk of South Texas. $1.00 each.

Downing, a larger, better berry, still, than Hick's: not so prolific, and not so hardy.

FIGS.

Adriatic, very large, white, fine quality. The finest of commercial varieties, yet scarce in the United States. 50 cents each.

Brown Turkey, large, excellent. 25 cents each.

Black California, very large, dark purple, bears first year, new. 50 cents each.

Blue Ischia, an excellent large, old variety. 25 cents each.

Celestial, medium, pale purple, very sweet, early, very prolific, bears first year. Have marketed bushels of this variety in Denison at 20 cents per pound.

Magnolia, large, rich fruit, yellowish, bears well on young shoots first year. 50 cents.

San Pedro, new, very large, white, excellent, bears first year, prolific. 50 cents each.

White Pacific, one of the finest figs of recent introduction. 50 cents each.

JAPAN PERSIMMONS.

THIS REMARKABLE FRUIT DOES WELL ALL THROUGH THE SOUTH—40 CENTS EACH.

Daidia Maru, round, red, tender and juicy.

Hachija, very large, oblong, vermillion, very fine.

Hyakume, very large, round, vermillion, delicious, late.

Kurokume, medium to large, flat at stem, fine.

Tane Nashi, or **Seedless,** large, oblong, yellow, fine for drying.

Yedoichi, large, round, flat at stem, vermillion, best quality.

Yemon, delicious when ripened in drawers or boxes covered tightly, tomato shape.

ZinJi-maru, medium, round, red, very fine, especially if frosted.

POMEGRANATE.

Spanish Ruby, the largest finest and most prolific of fruiting varieties. Will succeed, with a little winter protection, anywhere in Texas. It is a fruit without disease, and deserves extensive cultivation. $1.00 each.

NUTS.—SELECT TEXAS PECANS.

ONE YRAR OLD—25 CENTS EACH, UNLESS OTHERWISE NOTED.

In hundred or thousand lots will price very low. The Pecan is the finest nut known and destined soon to be cultivated extensively for commercial purposes.

Each name indicates trees all grown from nuts taken from a single tree. All these six lots were grown from the finest nuts in size, thinness of shell and excellent quality I have ever tested.

Beauty, short, thick, hickory-nut-shaped, thin-shell, rich.
Jumbo, very large, long, beaked, thin, excellent.
Paper-Shell, large, nutmeg-shaped, thinest shell. Best. 50 cents.
Pearl, similar to Paper-Shell, nearly white, finest quality.
Red River, large, long, regular, pecan-shaped, fine.
Riverside, large, nutmeg-shaped, shell very thin, quality best.

Juglans Sieboldii Cordiformis, Heart-Shaped Japan Walnut. This is one of the finest nuts known, and yet very scarce, even in Japan, where it originated. The nut cracks easily, and the kernel *drops out whole*. The flavor is sweeter and richer than the English Walnut, the tree hardier, and very handsome, two year trees, each $1.00, two year trees, 12 $9.00.

JAPANESE MAMMOTH CHESTNUT—50 Cents.

This Chestnut succeeds well in the South where the American and Spanish burn out. It is of immense size and fine quality.

BLACK WALNUT.

Two years, once transplanted, 15 cents each, $10 per 100.

MY HYBRIDS AND SEEDLINGS.

Another seasonable test has fully confirmed all I claim for these magnificent grapes.

BRILLIANT GRAPE. (See page 10.)

(From a Photograph life size; have this year produced much larger clusters than the one shown in cut.)

DESCRIPTION:—This is a seedling of Lindley crossed by Delaware, produced by me in 1883. The vine is healthy, vigorous and hardy, having endured the winters of New York and Ohio with impunity. It ripens with the Delaware, is very prolific, berries and clusters as large as Concord, compact, translucent red, similar to Delaware, quality about the same as Delaware with less pulp, seeds 1 to 3, skin thin and tough, berries adhere firmly to penuncle, making it a splendid early market grape, suitable for long shipments, and it will command the highest price. It makes a fine white or amber wine.

PRICE:—$1.00 each; $.900 per 12.

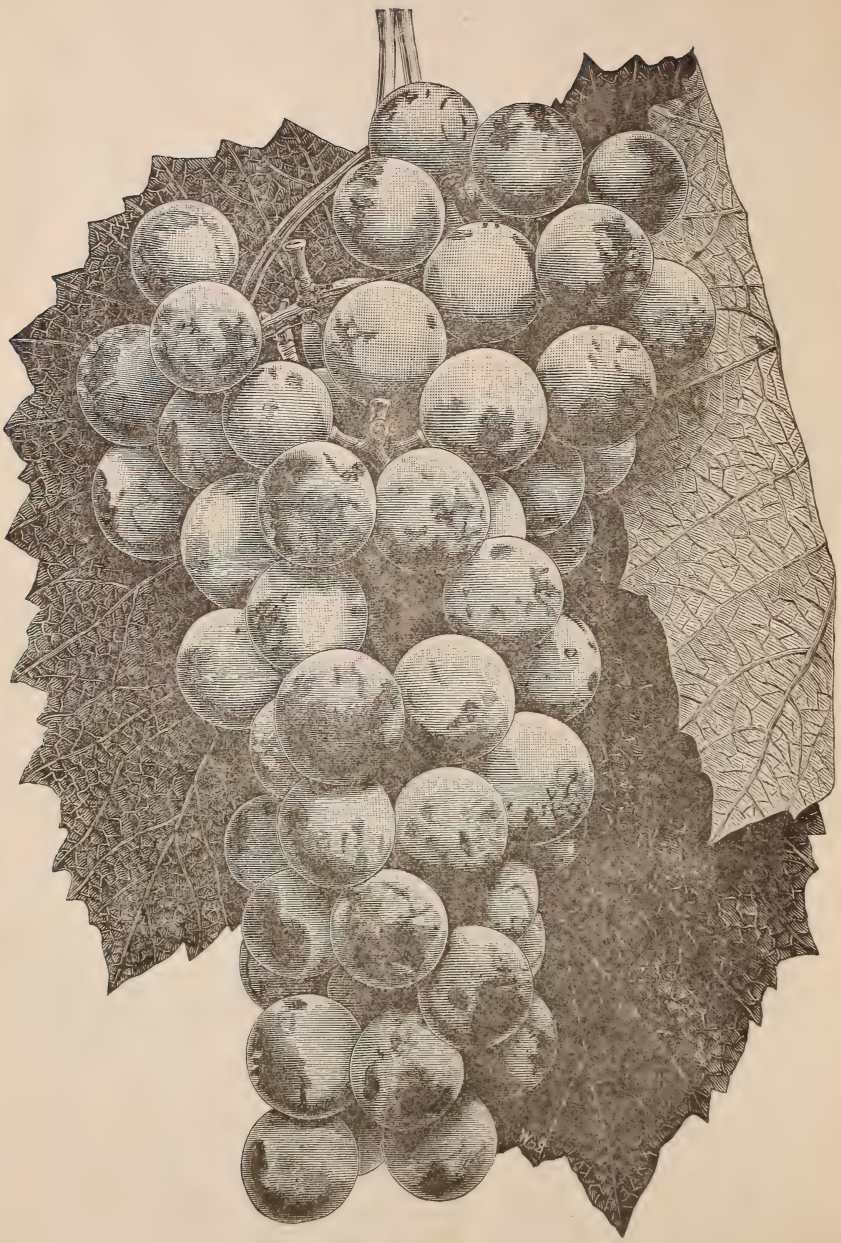
TESTIMONIALS.

From Herman Jaeger's notes on samples sent him to test, July 24, 1890.
"Brilliant: first quality, beautiful, sweet and pure, keeps and ships well."

From Hon. T. T. Lyon's notes of samples sent to test, July 28, 1990.
"Brilliant: bright wine-color, bunch cylindrical of medium size; berry medium or above; pulp of medium texture; flavor vinous, rich, excellent."

From Description of Hon. Geo. W. Campbell, September, 1890.

"Brilliant: vine very vigorous; foliage large and healthy; bunches and berries large; skin thin but firm; flavor very pure, sweet, rich, slightly vinous, entirely free from foxiness; pulp tender and juicy; texture much like Delaware; quality very nearly if not quite equal to Delaware in best condition; color, brilliant red. I have had the



BRILLIANT. (See page 9.)

Brilliant growing on trial, for four years, have fruited it for the past two years and can recommend it with every appearance of being a grape of remarkable excellence, adapted to general cultivation, as it has proven satisfactory in all respects. I shall plant it with confidence for garden or vineyard. Its beauty and excellence will command a profitable market wherever and whenever it may be offered."

After another year's trial Mr. Campbell confirms all he has said of Brilliant heretofore.

G. W. CAMPBELL GRAPE. (See page 12.)

(From a Photograph, life-size. Had cluster this (1891) at least twice the size, with larger berries.

DESCRIPTION:—A seedling of G. W. Campbell's Triumph produced by me in 1883; vine vigorous and healthy, much resembling its parent; it appears to be as hardy as any of the Rogers Hybrids. Very prolific; bunch, large, long and compact; berry medium, very persistent, beautiful golden yellow; skin thin, tough; melting without pulp, pure rich vinous of the highest quality, excelling even the Triumph, which took the premium at the St. Louis Grape Show as the best American Table Grape. It ripens with or a little before Delaware; and is little suject to rot or other diseases. Named in honor of GEO. W. CAMPBELL.

PRICE:—$1.00 each; $9.00 per 12.

TESTIMONIALS.

From Hon. T. T. Lyon's notes on samples sent to test, July 28, 1890.

"G. W. Campbell: white, bunch long; berry round, medium size, very tender; flavor vinus, excellent."

From Hermann Jaeger's notes on samples sent him to test, July 24, 1890.

"G. W. Campbell: best, adheres to bunch, keeps and ships well; sweet, sprightly, buttery to juicy; no pulp; quality pure, superior even to Delaware."

From Hon. Geo. W. Campbell's notes on Grapes sent to test, July 25, 1890.

"G. W. Campbell: light greenish yellow, with thin, whitish bloom; bunch medium large, long, shouldered; berries medium to large; skin thin, almost transparent, not easily broken; carries remarkably well; pulp tender and juicy; seeds small and few; flavor rich and pure, equal to the foreign Chassalas, which it resembles.

ROMMEL GRAPE.

(From a Photograph, life size. See page 14.)

DESCRIPTION:—Produced by me in 1885 by crossing the Triumph upon Elvira. Vine very vigorous, free from disease, not even attacked by the Leaf Roller; clusters medium, simple or shouldered, compact, handsome; berry medium to large, yellowish white, translucent; skin thin and tough; pulp melting; seeds few and small; quality best, pure, sprightly, vinous; season about the same as Delaware; the vine is very hardy to resist cold or heat, and is very productive. Named for JACOB ROMMEL, of Missouri. I recommend this variety for extensive trial, North as well as South, as a very superior grape.

PRICE:—$1.00 each; $9.00 per 12.

TESTIMONIALS.

From Hon. Geo. W. Campbell's notes on grapes sent to test, July 25, 1890.

"Rommel: light greenish yellow, with white bloom; bunch long and handsome; berry a little above medium; pulp very tender and juicy; pure flavor; skin thin but tenacious. Berry adheres firmly to the stem."

From Hon. T. T. Lyon's notes on grapes sent to test, July 28, 1890.

"Rommel: white; bunch cylenderical; berry quite medium; flavor vinous, moderately rich, apparently not fully ripened."

From Hermann Jaeger's notes on grapes sent him to test, July 24, 1890.

"Rommell: may almost equal 'G. W. Campbell's' in quality."

HERMANN JAEGER GRAPE.

(From a Photograph life size. See page 15.)

DESCRIPTION:—A hybrid produced by me in 1885 by using pollen of the Herbemont upon one of the best varieties of *Vitis Lincecumii* found wild in this vicinity. Vine exceedingly vigorous, healthy and prolific. It will probably endure the winters as far north as 40°. Bunch very large, shouldered or double-shouldered compact; berry medium of a dark purple, covered with a rich bloom, very persistent to the stem; skin thin, tough; pulp melting, very juicy, sweet and sprightly, of the best quality; seeds small. A very attractive and valuable grape for market, table or wine. Ripens with or a few days later than Concord.

PRICE:—$1.00 each; $9.00 per 12.

TESTIMONIAL.

From Herman Jaeger's notes on grapes sent him to test, July 30, 1890.

"Herman Jaeger: not fully ripe when received, but the ripest berries equal to Brilliant in quality and surpass it in sprightliness; and when fully matured will no doubt make fine white or rose-colored wine; ships and keeps well. It almost equals Herbemont in quality and is so superior in beauty that I would be proud indeed, to have it named after me."

An assortment of eight vines of my four varieties will be supplied for $6.00, or an assortment of twelve vines for $9.00.

Address: **T. V. MUNSON, Denison, Texas.**

Mr. G. W. Campbell of Delaware, O., and Mr. Hermann Jaeger of Neosho, Mo., have kindly consented to assist me in disseminating my varieties. Any orders placed with them will receive the same careful attention as if sent to me.

A RARE OPPORTUNITY.

To persons purchasing one or more plants of my four new varieties, of grapes who may request it, a package of hybridized grape seeds, liable to produce most valuable new types of grapes, will be mailed free.

Only seeds of varieties most likely to produce successful varieties in the region where you live will be sent. These seeds were not gathered at random, but with the utmost care to produce new and valuable families of varieties for different regions.
